Spanish Curriculum Intent

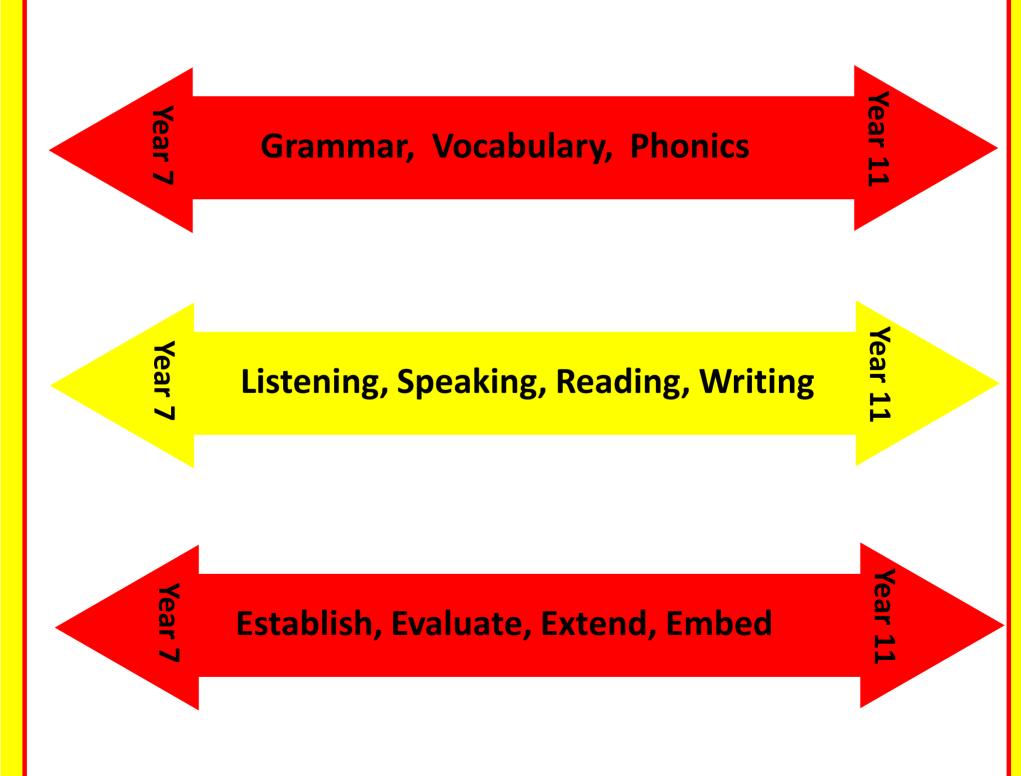

At NHTS we think and communicate as linguists.

We celebrate our students existing linguistic knowledge and cultural awareness. We show students how they can use languages both for travelling to different countries across the world and for future employment opportunities in this country and beyond.

Our curriculum is based upon the four key skills of listening, reading, speaking and writing. We use our student's knowledge of the English language or their own additional home language, and build upon this to introduce them to new challenges.

We build knowledge which can be recalled and applied across different topic areas. Students can demonstrate this knowledge in their class work and book work. We pay particular focus to grammar, vocabulary and phonics.
